This report should include a one to two page summary evaluation of the project, noting which project objectives were met, which were not, benefits to the home campus and, where appropriate, collaboration with consortial campuses, and whether this project might lead to further research opportunities, professional collaborations, new courses or revised course designs. We would like to have copies of any resulting publications or digital media and if you have some digital photos you would be willing to share, please send them to us as well.
